This section is *optional* and can be used to provide a summary of recommendations to the IT manager regarding which controls and/or compliance best practices Botium Toys needs to implement, based on the risk posed if not implemented in a timely manner.

Recommendations (optional): In this section, provide recommendations, related to controls and/or compliance needs, that your IT manager could communicate to stakeholders to reduce risks to assets and improve Botium Toys' security posture.

While the organization does have security plans in place, there are still various ways for external (even internal) threat actors to hack into the company's system. At the very least, they should secure the internal threats: implement principles such as Least Privilege and separation of duties. Moreover, they have to ensure business continuity. Employees should have access to better password management policies and should not drop productivity just because they forgot their password. Overall, the company should review its security controls,

frameworks, and compliance to reduce and mitigate external threats. They should implement more robust measures to ensure confidentiality, integrity, and availability.
